## greenprint:recycled

**POST CONSUMER RECYCLED** 

# STRAWS LIDS

### WHAT IS POST CONSUMER RECYCLED?

Post-consumer recycled content, commonly known as PCR, is made from materials that consumers regularly recycle, such as aluminum, cardboard, paper, and plastic bottles. PCR, compostable, and other recyclable packaging options are sustainable because they can be reused, recycled, or composted instead of being discarded after just one use.

#### **ENERGY SAVING**

PCR cuts energy use by at least 79% and lowers greenhouse gas emissions by at least 67%.

#### **REDUCE WASTE**

Turning recycled materials into new products we can use again helps decrease the amount of waste that ends up in landfills.

#### **REDUCE CAS EMISSIONS**

Producing items from recycled PET, HDPE, and PP reduces greenhouse gas emissions equivalent to removing nearly half a million cars from the road.

#### **CICULAR ECONOMY**

Incorporating recycled plastic content can raise environmental awareness among consumers and support the growth of a circular economy.

In both cold and hot meals, ranging from 32° to 176° F.

LONG SHELF LIFE TIME

Shelf life time greater than 365 days.

**TESTING** 

By EMA accredited labs in conformity to ASTM 5511 & ISO 15985

PREMIUM PRODUCTS

With high rigidity and durability, 100% reciclable and reusable.

**DISPOSAL** 

Please dispose of these items in a recycling bin. If not available, in a trash can.

**OEM AVAILABLE**
