

AGAVE

STRAWS **CUPS**

CUTLERY **LIDS**

HOW IS AGAVE FIBER MADE?

Greenprint's Agave fiber sourcing is a meticulous process, transforming agro-industrial waste into a transformable material. Here's a quick look at our refined manufacturing method:

WASTE SOURCING

Acquiring agave waste from reputable tequila manufacturers ensures a responsible and sustainable supply chain.

FIBER PROCESSING

Agave residue undergoes processing to dry fibers, removing impurities and yielding high-quality, food grade talc.

COMPOUNDING

Refined agave fibers are processed to bind with a base, creating pellets transformed into visually appealing Agave products.

TRANSFORMING AND TESTING

Our quality shines through rigorous manufacturing and lab testing, guaranteeing product durability, performance, and environmental adherence.

OPTIMIZATION

Our manufacturing optimizes products for accelerated degradation, ensuring natural breakdown in trash disposal and reaching a biologically active landfill.

ADAPTATION TO EXISTING INFRASTRUCTURE

Our Agave products are designed to seamlessly integrate with current waste disposal systems, eliminating the need for specialized disposal methods.

HOT & COLD

Suitable for hot and cold drinks

DEGRADABLE

Agave based products are meant to be thrown and degrade in the trash

FSC CERTIFIED

All fibers used in our products are FSC certified

VARIANTS

Available in 4 different diameters and lengths

CERTIFIED

Product line is certified by ASTM 6400 and ASTM 5511 standards

OEM AVAILABLE
